## **Key Principles:**

Data Focused Culture Shift Partnership Collaboration Sharing of Data & Best Practise **Reducing Duplication** 

## VRP Data Strategy 25-26

Bespoke aggregated
Police data model

Police data model

allowing partners to

self serve.

Working with partners to facilitate their access to

TogetherCORE dashboards

to improve the VRP's access

to Police data in a

sustainable way.

The DAP brings the VRP together to coordinate efficient and effective data sharing to provide the evidence base of the local picture of serious violence, VAWG and ASB as part of a Public Health Approach.

Revise the Terms of Reference to refocus sharing best practise, for data sharing

We will implement identified

actions to facilitate data

sharing across HIPS VRP,

focusing on Education,

Health, Housing, Social Care

& Commissioned

Interventions

To produce an updated 2024/25 SNA.

To assess the current picture of serious violence in HIPS. Uses multi-agency data to help local partners identify groups and places most at risk of serious violence.

**Project Areas** 

**Project Implementation** 

partner responsibilities to opportunities & challenges

Encouraging partners with the evidence base by presenting local & national findings.

Monitoring of Data Sharing Agreements (DSA's), what data is routinely shared and what open source data is used for violence reduction purposes.

Data Capture for Evaluation

Data capture to allow monitoring of offending behaviour of individuals involved in commissioned interventions.

We are committed to improving our approach to robust evaluation of commissioned interventions and contributing to the local and national evidence base.

To identify young people who could be drawn into violence & intervene.

A multipurpose model used to support a number of operational use cases by identifying individuals at increased risk of serious violence.

Combines support, enforcement & community engagement to reduce serious youth violence.

Produce Identification and Management Tools to improve effective data sharing.

**Project Outcomes**
