Key Principles:
Data Focused Culture Shift
Partnership Collaboration
Sharing of Data & Best Practise
Reducing Duplication

VRP Data Strategy 26-27

The DAP brings the VRP together to coordinate efficient and effective data sharing to provide the evidence base of the local picture of serious violence, VAWG and ASB as part of a Public Health Approach.

As a partnership, we will share best practise, opportunities & challenges for data sharing.

Data & Analysis Partnership

Data products from HIOW Together used to support a number of programmes by identifying individuals at increased risk of serious violence.

PowerBI Products

We will produce an updated 2025/26 HIPS SNA, with district chapters.

Strategic Needs Assessment

To assess the current picture of serious violence in HIPS. Uses multi-agency data to help local partners identify groups and places most at risk of serious violence.

Encourage partners to engage with the evidence base by presenting local & national findings.

Partnership Data Tracker

We will implement identified actions to facilitate data sharing across HIPS VRP, focusing on Education, & Health.

Monitoring of Data Sharing Agreements (DSA's), what data is routinely shared and what open source data is used for violence reduction purposes.

Data Capture for Evaluation

Data capture to allow monitoring of offending behaviour of individuals involved in commissioned interventions.

We are committed to improving our approach to robust evaluation of commissioned interventions and contributing to the local and national evidence base.

Young Futures Prevention Panels

To identify young people who could be drawn into violence & intervene.

Use Identification and Management Tools to improve effective data sharing.

Focused Deterrence

Combines support, enforcement & community engagement to reduce serious youth violence.
